

European Surveillance of Veterinary Antimicrobials Consumption (ESVAC)

EGGVP concerns on data collection from MAHs

Elsa Vecino
EGGVP Technical Director

London, 5 February 2014

General comments

- Data collection: full support from EGGVP companies. Acknowledged value of ESVAC reports.
- Follow-up from last meeting:
 - ***Considerable admin burden for MAHs***
 - ***Overlapping, laborious, repetitive***
 - » ***Harmonization and simplification***

Case study - real situation. MAH with headquarters in Spain, SME with 70 employees, sales of AMs in 8 MS

Sales of VMPs / AMs Communication with MS

MS	ESVAC			Sales declaration	PSUR (3m, 1y, 3y)
	Tool	Deadline	Formulary		
1	e-mail	15-mar	Very different to ESVAC data collection form	Yearly	Fees
2	web	31-mar	Sophisticated web procedure, local language only		Fees
3	e-mail	July	Similar to ESVAC data collection form		
4	e-mail	20-mar	Similar to ESVAC data collection form		
5	web		Collected by organization in central database		
6	-	-	-	Monthly	Fees
7	e-mail	June	Similar to ESVAC data collection form	Yearly	Fees
8	e-mail	Feb-March	Excel-adapted from ESVAC data collection form		

Overlapping, laborious, repetitive...

- Data not collected uniformly
- Data not collected at same period
- Data already reported by other means

Processing and preparing this data is time consuming. Administrative burden is considerable, and even more disproportionate for SMEs.

Is there room for simplification?

- *Step 1:* synchronize timings and harmonize formularies
- *Step 2:* merge information reported by different means
- *Step 3:* central reporting

Thank you!
